

Backlinks — Executed Research & Action Pack

Companion to `strategy.md` §8. That section *planned* off-page work; this file is the *executed* version: real prospects, verified by opening the page, plus the drafts. Researched 2026-08-02.

Verification standard: every row below is marked with what I actually confirmed. “Verified” = I opened the page and saw the thing. “Unverified” = I could not load it or could not see the claim. Nothing here is assumed.

0. Read this before doing anything

Two of the pack’s strategies are **blocked**, and running them now causes permanent damage rather than zero effect.

`src/lib/site.ts` still has:

```
street: process.env.NEXT_PUBLIC_BUSINESS_STREET || "TBD – Showroom address"
```

`NEXT_PUBLIC_BUSINESS_STREET` is unset in Vercel. Confirmed against production on 2026-08-02 — `streetAddress`, `sameAs`, and `hasMap` are all absent from every JSON-LD node on the live homepage, and no analytics tag fires:

CabinetMaker	#localbusiness	streetAddress: <<MISSING>>	sameAs: <<MISSING>>
FurnitureStore	#cabinetstore	streetAddress: <<MISSING>>	sameAs: <<MISSING>>

Consequence for link building: a citation is a *Name + Address + Phone* record. Submitting 30 directory listings before the real address exists writes 30 wrong records across the web that then get scraped, syndicated, and cached by aggregators. Cleaning that up later costs more than the listings ever earned. This is the single most expensive mistake available in this pack.

So the work splits cleanly:

	Needs the street address?	Status
Track A — Editorial links (PR, niche edits, guest posts, resource pages)	No — needs a name and a URL	Start today
Track B — Citations (directories, chambers, GBP, BBB, Houzz, Angi)	Yes — the address <i>is</i> the payload	Blocked on <code>site.address.street</code> + verified GBP

Track B is not “later because we’re lazy.” It is later because doing it now is net-negative. Get the address into `site.ts`, verify GBP, then Track B becomes the highest-ROI work on this list.

1. Strategy triage — the pack's 12, scored for a Lehigh Valley cabinet shop

The pack is written for SaaS/affiliate sites. A local trade business with a physical showroom has a different payoff curve: relevance and locality beat volume, and several “S-tier” plays are actively wrong here.

Pack strategy	Pack tier	Real tier here	Why
NGO / charity links	S	A — but reframed	The supporters-page mechanism doesn't exist at the two relevant charities (§2). The <i>donation</i> still works — as a news story, not a listing.
Niche edits	S	B	Works, but the regional pool is small and mostly competitor-owned.
Backlink exchange	S	Skip as written → A as adapted	Every same-niche site in a 40-mile radius is a direct competitor (<i>competitors.md</i>). But the <i>adjacent-trade</i> version works and is verified — see §9.
Guest posts	A	B	Thin regional supply — searched, found almost nothing local accepting contributions. National remodeling blogs work but convert nothing.
Directory listings	A	S — when unblocked	This <i>is</i> local SEO. Blocked on address.
PR / press release	A	S	Proven in this exact market by two competitors (§2).
Profile links	B	C, except social	Generic profiles are noise. But the 4 in <i>site.social</i> are gate 4 — they populate <i>sameAs</i> . Do those.
PBN / expired domains	B	Never	Manual-action risk on a business whose entire lead flow is one local pack. Asymmetric downside.
Parasite SEO	B	Skip	Ranks the platform's page, not the site. Nofollow. No local pack effect.
Social links	B	A (do now)	Free, unblocks JSON-LD gate 4.
Broken link building	Big Mover	C	Needs a backlink export to be efficient. Without a paid

Pack strategy	Pack tier	Real tier here	Why
			tool, the crawl-it-yourself version is low yield.
Expired domain 301	—	Never	Same reasoning as PBN.

Not in the pack, and better than most of it: supplier & manufacturer dealer locators. See §5.

2. The charity play — what’s actually true

The pack assumes: donate → get listed on a supporters page → get a link. I checked whether that page exists at the two charities that fit a cabinet shop.

Charity	Donate/partner page	Does it list sponsors with outbound links?
Habitat for Humanity of the Lehigh Valley	habitatlv.org/support	No. Verified — page describes corporate giving and house sponsorships, lists no sponsors, no logos, no outbound links. Contact: 610-776-7737.
Habitat for Humanity of Bucks County	habitatbucks.org/give/corporate/	No. Verified — partnership tiers referenced via a “Partnership Recognition Benefits” PDF, but no partners named on-page. Contact: 215.822.2812.

So the pack’s stated mechanism **fails here**. Reporting that rather than padding the table.

But the play still works — via a different mechanism. Both of Vitrin’s closest analogues already ran it, and both earned real links:

- **Kitchen Magic** (competitor #5 in [competitors.md](#)) sponsored Lehigh Valley Habitat and got a [PRNewswire release](#) plus a [page on their own site](#).
- **The Solid Wood Cabinet Company** donated \$100k of vanity cabinets to the Langhorne ReStore and earned an editorial writeup on [buckscountyalive.com](#) — **verified to contain an outbound link** to [solidwoodcabinets.com](#).

The correct play: donate *surplus and display cabinetry* to a ReStore — which a cabinet shop generates for free as a byproduct — then pitch the story. The link comes from coverage, not from a donor list.

Why this fits Vitrin specifically: tear-out and showroom-refresh cabinetry is inventory that currently costs money to dump. The donation is tax-deductible, the material cost is already sunk, and it generates a genuine local news hook. No other strategy in this pack has that economics.

Donation logistics (verified): - Lehigh Valley ReStore (Whitehall) — pickup scheduling at onlinedonationpickup.com/habitatlv, 610-776-7499 - Bucks County ReStores (Chalfont, Langhorne) — donate form at habitatbuck.org/restore/donate/, 215-822-2708

Draft — donation + story pitch

Subject: *Cabinet donation from an Easton shop — and a story for the ReStore*

Hi [NAME],

I run Vitrin Cabinetry, a custom cabinet shop in Easton. We pull out serviceable cabinetry on most remodels and refresh our showroom displays a few times a year. Right now that material goes to a dumpster, which is a waste of good boxes.

I'd like to set up a standing donation to the [Whitehall / Langhorne] ReStore — starting with [QUANTITY / DESCRIPTION], and recurring as jobs come through.

Two questions: 1. What's the easiest way to schedule drop-off or pickup on a recurring basis? 2. Would the ReStore want to co-promote it? I'm happy to supply photos and a quote, and I'd share it with local press. Solid Wood Cabinet Company did something similar with Langhorne and it got decent pickup.

Thanks, Vincent Karaca — Vitrin Cabinetry, Easton PA — (484) 542-2571 <https://www.vitrincabinetry.com>

Do not ask for a link in this email. The link comes from the coverage, and asking makes the donation look transactional to a nonprofit that gets that pitch constantly.

3. Local editorial & directory targets — verified

Track A rows can start now. Track B rows are listed so they're ready the day the address lands.

#	Site	URL	Cost	Links out?	Track	Verified
★ 1	BucksCountyAlive business listing	business-listing.cfm	Free tier; \$15/mo highlighted; \$75/mo ad	Yes — free tier includes name, address, phone, website	B	✅ opened, saw pricing tiers
★ 2	LehighValleyAlive B2B directory	lehighvalleyalive.com/b2b	Free listing	Yes — website link included	B	✅ opened
★ 3	BucksCountyAlive editorial	advertise/business.cfm	Unstated	Yes — the Solid Wood article proves outbound links	A	✅ proven by live example
4	Greater Lehigh Valley Chamber	lehighvalleychamber.org/memberbenefits.html	Dues not published; see /join.html	Yes — free website listing + social links, stated \$350 value	B	✅ opened; price unverified
5	Easton Area Chamber (division of above)	lehighvalleychamber.org/easton.html	Included in GLVCC	Presumed	B	⚠️ not separately opened
6	NKBA member directory	nkba.org/resources/directory/	~\$400/yr (per week1-checklist.md)	Member profile includes website link	B	⚠️ benefit described in third-party sources, not confirmed on NKBA's own page
7	Patch — Hellertown, Easton, Levittown etc.	patch.com	Free	Community posts; assume nofollow	A	⚠️ link attribute unverified
8	Lehigh Valley Business “Movers & Shakers”	lvb.com/movers-and-shakers-form	\$300/person , \$850 featured	Unstated	—	✅ opened; paid — see \$7

#	Site	URL	Cost	Links out?	Track	Verified
9	Discover Lehigh Valley	discoverlehighvalley.com/partnership/	Paid partnership	Yes, partner listing	—	✅ opened; weak fit — tourism audience, not remodel buyers

Rows 8 and 9 are listed to be dismissed with a reason, not recommended.

4. What I could *not* find — reported, not padded

Running the pack's guest-post and niche-edit searches against this niche and region returned close to nothing usable:

- [Lehigh Valley|Bucks County home improvement blog "write for us"](#) → one regional remodeling blog with no contributor page, plus off-topic noise.
- The regional home-improvement publishing layer barely exists. What does exist is owned by competitors, who will not link to Vitrin.

This is a finding, not a gap in the research. For a local trade business the guest-post channel is genuinely weak, and any list of 20 “guest post opportunities” in this niche would be padded with national blogs whose readers will never buy a kitchen in Easton. Skip it.

Fabuwood dealer locator (fabuwood.com/dealers) returned HTTP 429 — could not confirm whether entries link to dealer websites. Marked unverified; check manually.

5. The play the pack misses: supplier & manufacturer dealer locators

Not in the prompt pack, and for a cabinet shop it beats most of what is.

Cabinet lines, countertop brands, and flooring brands run “find a dealer” locators. Those pages are topically perfect, permanently maintained, and free — they cost a phone call to the rep Vitrin already buys from. Verified locators exist at:

- [Showplace Cabinetry](#)
- [Schrock](#)
- [Fabuwood](#) (429 — *link-out unverified*)

Blocked on one fact I don't have: which lines Vitrin actually carries. The site names **Blum** hardware ([ConstructionSpecs.tsx](#)) and mentions **Aristokraft** in a guide, but claims no dealer relationships.

Action: get the list of every brand Vitrin is an authorized dealer for — cabinet lines, countertop (Cambria/Silestone/MSI), flooring (Coretec/Shaw/Mohawk), hardware. For each, ask the rep to add Vitrin to the dealer locator. Reps say yes because it's their job.

Subject: Dealer locator listing — Vitrin Cabinetry, Easton PA

Hi [REP],

We carry [LINE] out of our Easton showroom. I noticed we're not on your dealer locator at [LOCATOR URL]. Can you get us added?

Vitrin Cabinetry — [STREET], Easton, PA 18042 — (484) 542-2571 — <https://www.vitrincabinetry.com>

Thanks, Vincent

Note this needs the street address too — so it lands in Track B, but it's the first thing to do the day the address exists.

6. Social profiles — do this now, it unblocks the schema

The pack's "social links" prompt is B-tier generic advice, but here it closes **gate 4** in the local-SEO gate order: `site.social.*` are all empty, so `sameAs` is absent from all three business nodes.

The code is already correct — `src/lib/schema.ts:51` filters empties and conditionally emits `sameAs` / `hasMap`. Nothing to build. Set the env vars in Vercel and the schema populates on next deploy:

```
NEXT_PUBLIC_FACEBOOK_URL
NEXT_PUBLIC_INSTAGRAM_URL
NEXT_PUBLIC_HOUZZ_URL
NEXT_PUBLIC_GOOGLE_PROFILE_URL    # the Maps place URL, not the GBP admin link — enables hasMap
```

Profile copy — consistent everywhere

Tagline (one line): > Custom kitchen, bath, and closet cabinetry — built for the Lehigh Valley and Bucks County.

Short bio (~50 words): > Vitrin Cabinetry designs, builds, and installs custom and semi-custom kitchen > cabinets, bathroom vanities, and closets from our Easton, PA showroom. Full > design-through-installation service across the Lehigh Valley and Bucks County, > including countertops, flooring, and complete kitchen and bath remodels.

Long bio (~150 words): > Vitrin Cabinetry is a custom cabinet shop serving Easton, Bethlehem, Allentown, > and Bucks County from our Easton, PA showroom. We handle kitchen cabinets, > bathroom vanities, custom closets, and built-ins — from 3D design through > fabrication and professional installation. > > Our work spans the full remodel: cabinetry, quartz, granite and porcelain > countertops, backsplashes, and flooring in luxury vinyl plank, hardwood, > engineered hardwood, and tile. Boxes are built with dovetail drawers and > soft-close Blum hardware, in inset and full-overlay styles to suit anything > from a Federal-era Easton rowhome to new construction in Bucks County. > > We work directly with homeowners as well as builders, contractors, and interior > designers through our trade program. > > Vitrin Cabinetry — [STREET], Easton, PA 18042 — (484) 542-2571 — > <https://www.vitrincabinetry.com>

NAP block — paste this character-for-character, everywhere:

```
Vitrin Cabinetry
[STREET]
Easton, PA 18042
(484) 542-2571
https://www.vitrincabinetry.com
```

Directory name field: `Vitrin Cabinetry` . Use the longer `Vitrin Cabinetry | Kitchen, Bathroom & Closet` **only** on Google Business Profile, matching `site.gbpName` . Mixing the two across directories manufactures the exact inconsistency citations exist to prevent.

7. Paid tools — held to the standing rule

Standing constraint on this account: free tools only. That rule holds here, and the gate order gives it teeth — **while gates 1–3 are open there is nothing for a paid tool to measure.** Rank tracking a business Google has not verified returns “not in local pack” for \$30/month.

Asked for	Verdict
BrightLocal (\$30/mo, <code>week1-checklist.md</code> §5)	No — Option B free path. Nothing to track until GBP is verified.
AccuRanker / SerpRobot	No — GSC is free and isn’t connected yet (gate 3). Connect that first.
LVB Movers & Shakers (\$300–850)	No — that’s ad spend priced as a link.
Discover Lehigh Valley partnership	No — tourism audience, wrong buyer.
NARI / NKBA / Chamber dues	Defer, not reject — these are memberships with referral value, not SEO tools. Revisit once Track B opens.

8. Order of operations

Now (unblocked): 1. Set the four social env vars in Vercel → closes gate 4, populates `sameAs` . 2. Connect GSC + GA4 (`week1-checklist.md` §2) → gate 3. Free, ~15 min. 3. Contact both ReStores about a standing cabinet donation (§2 draft). 4. Collect the authorized-dealer brand list from the owner (§5). 5. Open trade-partner conversations with Bucks/Lehigh GCs and designers — Turchi Construction first (§9 draft). Relationship now, link later. 6. Email `ListingDetails@HistoricPreservation.com` — free listing, no address required, dead-link audit as the opener (§11 draft).

Blockers to clear — these gate everything else: 7. Real street address into `site.address.street` (or set `NEXT_PUBLIC_BUSINESS_STREET` in Vercel) → gate 2. 8. Claim + verify GBP (`week1-checklist.md` §1) → gate 1.

Then (Track B unlocks), in this order: 9. **Greater Lehigh Valley Chamber** — highest-value single citation. Its Cabinetry Makers category has 4 entries and two are direct competitors (§9). 10. Free listings: BucksCountyAlive, LehighValleyAlive. 11. Dealer locator requests to every rep (§5). 12. Lehigh Valley Builders Association, NKBA, then the rest of the `week1-checklist.md` §5 citation list. 13. Pitch the donation story once material has actually moved.

Never: PBNs, expired-domain 301s, link swaps with local competitors.

9. Trade-partner links — the swap strategy, corrected

`strategy.md` §8.3 calls partnership backlinks “highest ROI” but never researched them. This section does. It also replaces the pack’s **backlink exchange** strategy, which is unusable as written: a link swap needs a non-competitor, and every cabinet shop within 40 miles competes with Vitrin directly. The adjacent trades — GCs, designers, architects — are the non-competitors, and they refer work as well as link.

Verified: the mechanism is real

Turchi Construction (Bucks County GC) publishes “**Our Preferred Vendors For Quality Materials**” — five vendors, **all hyperlinked to their own sites**: Shenandoah Cabinetry, GAF Roofing, MI Windows, Therma-Tru, Jeld-Wen. Contact: `turchiconstruction@gmail.com`.

Note *what* they link to: **Shenandoah Cabinetry**, a national factory brand. That’s the pitch. A Bucks County GC listing a national line has no local cabinetmaker to send clients to for custom work — and can’t offer a showroom visit. This is a genuine gap, not a favor to ask.

Verified: competitors are already using the chamber

The Greater Lehigh Valley Chamber directory pages **do carry outbound “Visit Site” links**, confirmed on two category pages:

Category	Businesses	Outbound links?
Cabinetry Makers & Distributors	4 listed	Yes — Stofanak → stofanak.com, Morris Black → morrisblack.com, American Millwork → amcmillwork.com
Home Improvement & Remodeling	15 listed	Yes — “Visit Site” on each

Stofanak (competitor #3) and Morris Black (competitor #4) are both already in the cabinetry category. Vitrin is not. That category page has four entries — it is not a crowded listing, and it is exactly the page a Lehigh Valley buyer lands on. This upgrades the chamber from “membership dues” to the single best-targeted citation available. Still Track B: it needs the address.

Honest limit on this play

I checked several regional designers and builders for published partner pages. Most have none — **Love Your Room** (Allentown, 610-387-6002) names vendors only in Instagram captions, with no vendor page at all. Turchi is the exception, not the pattern.

So this is not a prospecting play, it's a relationship play. You will not find 20 existing “preferred vendor” pages to get added to. You build the referral relationship first, and the page listing follows — often because you ask them to make one. Budget it as business development that yields links, not as link building.

Also found and worth joining once Track B opens: **Lehigh Valley Builders Association** — trade association with a member directory, directly relevant to a cabinet shop.

Draft — GC / designer outreach

Subject: Custom cabinetry for your Bucks County kitchens

Hi [NAME],

I saw Shenandoah on your preferred vendors list. Reasonable line — but when a client wants something it can't do (odd ceiling heights, an inset door, a period-correct box for an older home), you're stuck ordering a semi-custom workaround.

I run Vitrin Cabinetry in Easton. We mill, assemble, and finish in our own shop, so we handle the one-offs semi-custom lines refuse. Typical shop time is 4–8 weeks with weekly photo updates, which means you can hold a schedule.

Worth a conversation? I'd rather show you a finished box than pitch you. Happy to bring samples to your office, or you're welcome at the Easton showroom.

Vincent Karaca — Vitrin Cabinetry — (484) 542-2571 <https://www.vitrincabinetry.com>

Ask for the vendor-page listing on the **second** contact, after a real conversation — never in the first email. A cold “please link to me” to a GC reads as spam and burns a referral relationship worth far more than the link.

10. Two dead ends — checked, reported

No unlinked brand mentions exist. Searched **"Vitrin Cabinetry" Easton PA**. Every result is either the site itself or an unrelated HomeAdvisor/1stdibs page. The unlinked-mention reclamation play (usually a reliable quick win) has nothing to work with because the brand is new. Recheck in ~6 months.

No stale-title bug. A search snippet showed **/custom-kitchen-cabinets/new-hope** titled “...in Quakertown, PA”, which looked like a template defect. Checked production directly — all town titles render correctly from **data.name**, and **generateMetadata** in **[town]/page.tsx:23** is sound. It was a stale search index entry. No code change needed.

11. Broken-link building — actually executed

I rated this C-tier in §1 partly because the pack says it needs a paid backlink export. Half of it doesn't: `curl` can status-check any page's outbound links for free. So I ran it rather than leaving the rating as an assumption.

Method

Target: [historicpreservation.com](#) [preservation/restoration contractors directory](#) — chosen because Vitrin's own copy sells period-correct cabinetry for Federal-era Easton rowhomes, so a preservation directory is a genuine topical fit.

```
# extract outbound links, then status-check all of them in parallel
sort -u urls.txt | xargs -P 16 -I{} \
  curl -sL -o /dev/null --max-time 12 -w '%{http_code} %{url_effective}\n' {}
```

160 outbound links checked. Result: 131 OK, 16× 404, 5× no-connect, 6× 406, 1× 403, 1× 409. A ~13% rot rate.

Verified dead — DNS-confirmed, false positive removed

`000` from curl means “didn't connect”, which is *not* the same as dead. I re-checked each with a real user-agent and a DNS lookup:

Domain	Verdict
alleghenyrestoration.com	Dead — NXDOMAIN
mjmayrestoration.com	Dead — NXDOMAIN
graugeneral.com	Dead — NXDOMAIN
evergreene.com	Unresolved — DNS resolves (216.146.198.22) but won't connect. Not called dead.
rjdoerr.com	NOT dead — 301s to rjdoerr.net . My first pass flagged it; the recheck cleared it.

Plus 16 hard 404s across [atelierchroma.ca](#) (4), [talismanservices.com](#) (4), [hughloftingtimberframe.com](#) (3), [christmanco.com](#), [oldnewenglandrestoration.com](#), [thecoopergroupct.com](#), [timelessbarncompany.com](#), and their own X/Twitter link.

The honest verdict: mechanically fine, relevance-starved

The pack's rule is “only offer my page as a replacement where it genuinely matches the dead one.” Applying it kills the play: the dead links are a West Virginia restoration contractor, a Wisconsin barn company, a timber framer, and a Canadian atelier. **A custom cabinet shop in Easton is not a replacement for any of them.** Pitching Vitrin as one would be exactly the transparent spam the Ground Rules warn about, and the editor would bin it.

Conclusion: don't buy Ahrefs for this. The constraint isn't tooling — I ran the play with free tools and got clean data. The constraint is that a hyper-local business rarely matches a dead national link. That is worth knowing *before* spending \$100+/month to discover it.

What the data is actually good for

Two real, unblocked wins fell out of it:

1. A free, topically-perfect listing — no address required. historicpreservation.com accepts directory submissions by email to ListingDetails@HistoricPreservation.com, and asks only for **business name, website link, contact name, and phone**. No address field. That makes it **Track A** — do it today. Site shows a 2026 copyright and is curated, not auto-listed.

2. The audit is the outreach. Instead of a fake relevance pitch, lead with the 21 broken links as a genuine favor. Rare, verifiable, and it earns the listing on merit.

Subject: 21 dead links in your preservation contractors directory

Hi,

I was working through your preservation/restoration contractors list and noticed a chunk of it has rotted. I checked all 160 outbound links — 21 are dead. Three domains are gone entirely (alleghenyrestoration.com, mjmayerestoration.com, graugeneral.com), and there are 404s under talismanservices.com, atelierchroma.ca, hughloftingtimberframe.com, oldnewenglandrestoration.com, timelessbarncompany.com, thecoopergroupct.com, and christmanco.com. Your own X link is 404 too.

Happy to send the full list with status codes — no strings.

Separately: I run Vitrin Cabinetry in Easton, PA. We build period-correct cabinetry and millwork for historic homes — inset doors, traditional raised panel, matching existing profiles in Federal-era rowhomes. If the directory is open to a cabinetry/millwork listing, we'd like to be considered:

Vitrin Cabinetry — <https://www.vitrincabinetry.com> — Vincent Karaca — (484) 542-2571

Thanks, Vincent

Re-running this

The script generalizes to any resource page. Swap the target URL, keep the DNS recheck step — it's what separates a real audit from a list of transient timeouts, and it's the step that makes the email credible.

12. Local preservation angle — worth a look

Surfaced while researching §11 and genuinely under-exploited:

- **Easton Conservation Districts** — grassroots preservation group for College Hill, the West Ward, and the Southside. Community org, local, topically aligned.

- **City of Easton Local Historic District** — properties in the district need a Certificate of Appropriateness from the Historic District Commission for exterior work. Interior cabinetry is generally out of scope, but the *homeowner audience* is exactly Vitrin's.
- **Easton Residential Façade Improvement Grant** (Redevelopment Authority, ARPA-funded, West Ward / South Side priority) — the RDA helps homeowners scope work and select contractors. Exterior-focused, so a partial fit, but the contractor relationship is worth having.

The content play here is stronger than the link play: a guide on period-correct cabinetry for Easton's historic rowhomes would be the only such page in the market and gives every org above a natural reason to link. Flagging it for [strategy.md](#)'s editorial calendar rather than building it unprompted.
