

Week 1 — Owner Action Checklist

A companion to `strategy.md`. These are the items that **only the business owner can do** because they require account creation, identity verification, or payment. The codebase items are already shipped (see end of file for what's been deployed).

Allow **2–4 hours total** across the week. None of these are hard; they just have to be done by an authorized human.

1. Google Business Profile (GBP) — highest priority

Why: GBP is the single biggest local-pack ranking signal. Without a verified profile, no amount of on-site SEO will surface Vitrin in the Map Pack.

Steps

1. Go to <https://business.google.com> → **Manage now**.
2. Search for “Vitrin Cabinetry, Easton, PA.” If a profile already exists (auto-created by Google), claim it. If not, create new.
3. Choose category: **Cabinet maker** (primary). Secondary: **Kitchen remodeler**, **Bathroom remodeler**, **Custom furniture maker**.
4. Verification: Google will offer postcard, phone, email, or video. Pick whichever is fastest. Video is usually approved within 5 business days.
5. **Once verified**, complete every field:
 - Business name (exactly `site.gbpName` : `Vitrin Cabinetry | Kitchen, Bathroom & Closet`)
 - Address (exact — must match `site.address` in `src/lib/site.ts` and every citation)
 - Service area (use the 15 towns in `site.areaServed`)
 - Phone (exactly `site.phoneDisplay` : `(484) 542-2571`)
 - Website URL: `https://www.vitrincabinetry.com`
 - Hours (must match `site.hours` : Mon–Fri 9–6, Sat 10–4)
 - Description (750 chars max — focus on craft + custom + Easton / Lehigh Valley)
 - Products → add 6+ cabinet styles with photos
 - Services → add 8+ (custom kitchens, bath vanities, closets, pantries, etc.)
6. Upload **20+ photos**: shop interior, team, completed projects, before/after pairs.
7. Add 10 seed Q&As yourself (the FAQ section is owned by whoever answers first).
8. Enable messaging.

Estimated time: 60–90 minutes initial + 5 minutes weekly.

Weekly cadence after launch

- 2 Google Posts per week (a project, a tip, an offer, a behind-the-scenes shot).
 - 5 new photos per week.
 - Reply to every review within 24 hours.
-

2. Google Search Console + Google Analytics 4

The site code is ready — just need to connect accounts and paste IDs into `.env.local`.

Search Console (free, ~5 min)

1. Go to <https://search.google.com/search-console> → **Add property** → **Domain** → enter `vittrincabinetry.com`.
2. Verify via DNS TXT record (Vercel makes this easy — copy the TXT, add it in the Vercel domain dashboard).
3. Submit sitemap: `https://www.vitrincabinetry.com/sitemap.xml` (the apex 301s to `www` — see `vercel.json`).
4. Set preferred reporting country: US.

Google Analytics 4 (free, ~10 min)

1. Go to <https://analytics.google.com> → **Admin** → **Create account** → “Vitrin Cabinetry.”
2. Create property → name “Vitrin Cabinetry Website” → United States → USD.
3. **Data Streams** → **Web** → URL `https://www.vitrincabinetry.com` → Stream name “Web.”
4. Copy the **Measurement ID** (starts with `G-`).
5. In the repo, copy `.env.example` → `.env.local`, paste the ID into `NEXT_PUBLIC_GA_ID`.
6. Set the same ID as a production env var in Vercel: `vercel env add NEXT_PUBLIC_GA_ID production`.
7. In GA4 Admin → Data Streams → your stream → **Enhanced measurement** → enable all toggles.

Link GSC ↔ GA4

In GA4 → Admin → **Product links** → **Search Console links** → link the property.

3. Microsoft Clarity (free heatmaps + session recordings)

1. Go to <https://clarity.microsoft.com> → sign in with Microsoft account.
 2. **New project** → name “Vitrin Cabinetry” → category Home Services → website URL.
 3. Copy the **Project ID** (alphanumeric string).
 4. Paste it as `NEXT_PUBLIC_CLARITY_ID` in `.env.local` and Vercel production env.
-

4. PxlPeak (lead delivery for the contact form)

The form does **not** send its own email. `src/app/api/contact/route.ts` POSTs the lead to PxlPeak's `/api/v1/leads`, which handles storage, fraud scoring, the owner notification, and the customer auto-reply — same setup as the other agency sites. There is no Resend account and no `RESEND_API_KEY` / `CONTACT_TO_EMAIL` / `CONTACT_FROM_EMAIL` for this project.

1. In PxlPeak, confirm the `vittrincabinetry.com` site exists and note its site UUID.
2. **Settings** → **Email receivers** (`v2.sites.settings.emailReceivers`) → add whoever should get lead notifications. This is the only place recipients are configured.
3. Create a publishable key scoped to that site (`pk_live_...`).
4. Set `PXLPEAK_API_URL="https://pxlpeak.com"` and `PXLPEAK_API_KEY` in `.env.local`, then set both in Vercel as production env vars.

Test: submit the form locally. A missing/blank key returns a 500 with `PXLPEAK_API_URL` or `PXLPEAK_API_KEY not configured` in the server log; a good submission returns `{ ok: true, id }` and appears in the PxlPeak leads dashboard.

Separately: `hello@vittrincabinetry.com` is published in the footer and JSON-LD but has no mailbox behind it yet. Provision it (or a forwarder) before launch — the contact form is unaffected, but anyone who clicks the address mails into a void.

5. Citation cleanup — BrightLocal (or free alternative)

Why: Inconsistent Name/Address/Phone across directories is a top-3 cause of stagnant local rankings.

Option A — BrightLocal (\$30/mo, fastest)

1. Go to <https://www.brightlocal.com> → sign up.
2. **Citation Tracker** → add the business.
3. Run the initial scan — it finds existing listings across ~30 directories.
4. Fix every inconsistency (NAP, hours, website).

Option B — Free path (Whitespark scanner + manual fixes)

1. Go to <https://whitespark.ca/local-citation-finder/> → free 3 scans.
2. Export the list.
3. Manually claim/correct on these high-value directories:
 - **Bing Places** — <https://www.bingplaces.com> (uses Google data; claim it)
 - **Apple Maps Connect** — <https://mapsconnect.apple.com>
 - **Yelp for Business** — <https://biz.yelp.com>
 - **Houzz Pro** — <https://www.houzz.com/pro/landing>

- **BBB** — <https://www.bbb.org> → Get Accredited (paid, optional but worth it)
- **Angi** — <https://www.angi.com/for-pros>
- **HomeAdvisor** — <https://www.homeadvisor.com/pro>
- **Thumbtack** — <https://www.thumbtack.com/pro>
- **Porch** — <https://www.porch.com/for-pros>
- **NextDoor Business** — <https://business.nextdoor.com>
- **Yellow Pages** — <https://accounts.yellowpages.com>
- **Foursquare** — <https://business.foursquare.com>
- **Manta** — <https://www.manta.com/claim>
- **Greater Lehigh Valley Chamber of Commerce** — <https://www.lehighvalleychamber.org> (covers Easton, Bethlehem, Allentown)
- **Upper Bucks Chamber of Commerce** — <https://upperbuckschamber.org> (secondary — only if defending the Bucks County pages)
- **NARI member directory** (after joining — see below)
- **NKBA member directory** (after joining — see below)

Rule: every entry must match `src/lib/site.ts` exactly — `Vitrin Cabinetry / [site.address.street] / Easton, PA 18042 / (484) 542-2571`. One wrong digit anywhere = inconsistency penalty.

6. Baseline keyword rank tracking

Set this up so we have a “before” snapshot.

Tool

- **AccuRanker** — \$30/mo, best UI (<https://www accuranker.com>)
- **SerpRobot** — \$9/mo, basic (<https://www.serprobot.com>)
- **Free path** — paste keywords into a Google Sheet, check positions manually weekly using an incognito window from an Easton IP (via VPN if traveling).

The 30 baseline keywords

Paste these into the rank tracker. Target location: **Easton, PA 18042** (must match `site.address` in `src/lib/site.ts`). Device: **mobile** (70% of local search is mobile).

#	Keyword	Tier
1	custom kitchen cabinets easton pa	T1 money
2	custom kitchen cabinets bethlehem pa	T1 money
3	custom kitchen cabinets allentown pa	T1 money
4	cabinet maker easton pa	T1 money
5	kitchen remodeling easton pa	T1 money
6	bathroom vanity easton pa	T1 money
7	custom cabinets lehigh valley	T1 money
8	kitchen designer lehigh valley	T1 money
9	custom kitchen cabinets quakertown	T2 town
10	custom kitchen cabinets perkasio	T2 town
11	custom kitchen cabinets doylestown	T2 town
12	custom kitchen cabinets sellersville	T2 town
13	custom kitchen cabinets souderton	T2 town
14	custom kitchen cabinets coopersburg	T2 town
15	custom kitchen cabinets hellertown	T2 town
16	custom kitchen cabinets emmaus	T2 town
17	custom kitchen cabinets harleysville	T2 town
18	custom kitchen cabinets lansdale	T2 town
19	custom kitchen cabinets new hope	T2 town
20	custom kitchen cabinets center valley	T2 town
21	kitchen cabinets bucks county	T2 regional
22	custom cabinets bucks county	T2 regional
23	cabinet refacing vs custom	T3 decision
24	stock vs custom cabinets	T3 decision
25	how to choose a kitchen designer	T3 decision
26	inset vs full overlay cabinets	T3 decision
27	quartz vs granite countertops	T3 decision

#	Keyword	Tier
28	custom kitchen cost bucks county pa	T3 decision
29	contractor cabinet pricing	T3 decision
30	flooring or cabinets first	T3 decision

Set the tool to email a weekly rank report. Save the **Week-0 snapshot** as the baseline — every gain measured from here.

7. Memberships to apply for (do in Month 1)

These are paid but pay back via citations + trust signals + referrals.

Organization	Annual cost	What you get
Upper Bucks Chamber of Commerce	~\$300–\$500	Local backlink + chamber referrals
NARI (National Association of the Remodeling Industry)	~\$500	Membership badge + member-directory backlink
NKBA (National Kitchen & Bath Association)	~\$400	Trust badge + directory listing + industry network
Houzz Pro	Tiered (free Lite, paid Pro)	High-DR profile (~92 DR), lead generation
BBB Accredited Business	~\$500/yr	Trust signal especially with older buyers

8. Photographer + videographer engagement

By end of Week 1, have two bookings on the calendar:

- **Project photographer** — monthly retainer, 1 finished kitchen shoot per month. Budget \$800–\$1,500/shoot.
- **Videographer** — one-time 60–90 second shop-tour hero video. Budget \$1,500–\$3,000.

Local recommendations (search Google Maps for “interior photographer Bucks County” — most will quote within 24 hours).

What’s already shipped in code (no action required)

The technical foundation that supports everything above is already deployed:

Deliverable	Where	What it gives you
Full <code>LocalBusiness</code> / <code>Organization</code> / <code>WebSite</code> JSON-LD on every page	<code>src/lib/schema.ts</code> + <code>src/app/layout.tsx</code>	Schema rich results eligibility
Site-wide Metadata API (title template, OG, Twitter, canonical, robots)	<code>src/app/layout.tsx</code>	All pages emit correct head tags
<code>next/font</code> for Inter + Playfair Display (self-hosted, zero CLS)	<code>src/app/layout.tsx</code>	Fixes layout shift + privacy
Hero image converted from CSS background to <code>next/image fill</code>	<code>src/app/page.tsx</code>	Better LCP + automatic WebP/AVIF
All internal nav uses <code><Link></code> (instant client-side transitions)	<code>src/components/Navbar.tsx</code> , <code>Footer.tsx</code> , <code>page.tsx</code>	INP + UX improvement
Production-only Google Analytics, Vercel Analytics, Vercel Speed Insights, Microsoft Clarity, all gated on env vars	<code>src/app/layout.tsx</code>	Measurement infrastructure
Contact form rebuilt as React client component → POST to <code>/api/contact</code> → PxlPeak leads API	<code>src/app/contact/ContactForm.tsx</code> , <code>src/app/api/contact/route.ts</code> , <code>src/lib/geolocation.ts</code>	Working lead capture with honeypot + validation
Single source of truth for NAP, hours, service-area towns	<code>src/lib/site.ts</code>	Edit one file, schema + footer + contact all update
Sitemap + robots updated with all routes	<code>src/app/sitemap.ts</code> , <code>src/app/robots.ts</code>	Crawler-ready
Security headers (X-Content-Type-Options, X-Frame-Options, Referrer-Policy, Permissions-Policy)	<code>next.config.ts</code>	Hardened defaults
<code>.env.example</code> documenting every required env var	repo root	Onboarding clarity

End-of-Week-1 Definition of Done

You can mark Week 1 complete when **all** of these are true:

- ☐ GBP claimed, verified, fully filled, 20+ photos uploaded, weekly cadence on the calendar.
- ☐ GSC verified for `vittrincabinetry.com`, sitemap submitted.
- ☐ GA4 property created, Measurement ID pasted in Vercel env, linked to GSC.
- ☐ Microsoft Clarity project created, ID pasted in Vercel env.
- ☐ `PXLPEAK_API_KEY` set in Vercel env, email receivers configured in PxlPeak, contact form tested end-to-end (real submission lands in the leads dashboard + notification inbox).
- ☐ `hello@vittrincabinetry.com` mailbox or forwarder provisioned.
- ☐ Citation scan run; top 15 directories show consistent NAP.
- ☐ 30-keyword baseline rank report saved as Week-0 snapshot.
- ☐ First project photographer booked.
- ☐ Shop-tour videographer booked.
- ☐ NARI / NKBA / Chamber applications submitted.
